ABOUT

I'm a U.S. Marine veteran that became a self-taught programmer, starting in 2013. I'm always eager to learn new things and have had the chance to explore many technologies and work in several different environments. I've attended multiple code camps, security conventions, and developer Meetup events. I'm excited for the future and the next chapter in my journey.

HISTORY

1/2018 - Present
iOS Developer
Freelancer
   Consulted with small business leaders, contributing input and guidance in the development of iOS applications.

10/2016 - Present
Network Administrator
Rockford Corporation
   Worked in a small IT Department, which allowed me to "wear many hats". Devised solutions to automate and streamline the workflow within the department.

5/2015 - 9/2016
Application Administrator & Developer
Dimension Data
   Implemented a new project porfolio management (PPM) tool as the sole administrator for the organization. Developed numerous dynamic reports that could be ran ad hoc, while having many automatically generated and sent to senior level leadership (CEO and COO) weekly.

EDUCATION

2018
The Complete iOS App Development Bootcamp
London App Brewery

2016
B.S. Information Systems Security
University of Phoenix

2014
Certified ScrumMaster
Scrum Alliance

SKILLS

Languages
I've used the following languages:
Swift, Python, HTML, CSS, JavaScript, Java, PowerShell

Agile
I enjoy working in agile environments, such as:
Scrum, Kanban

Tools
I'm quick to learn new tools and systems. Some applicable examples are:
Git, GitHub, Bitbucket, JIRA, Sketch
